A Brief Introduction of School of Electronic Engineering

<http://www.ee.uestc.edu.cn/>

University of Electronic Science and Technology of China(UESTC):

listed into '985' Project in China in 2001, this government project supports only less than 40 universities. For electronic information area, the university has well-known reputation.

the School of Electronic Engineering(SEE):

the largest one among 15 schools in the UESTC, both at faculty level and student level. It has 50% of national key disciplines in the UESTC, including signal and information processing, circuit and system, electromagnetic field and microwave technique.

Main Subjects of SEE:

Electronic Engineering, Electromagnetic Field and Wireless Technique, are national featured subjects.

Research Groups and Research Areas:

There are 24 research groups focusing on 8 main research areas including signal and information processing, image processing and digital audio/video techniques, integrated circuit and system, microwave remote sensing and imaging, nonlinear circuit and system, computational electromagnetics and its applications, novel antenna theory, and so on.

● Administration Departments, Center, IEEE Organization in the SEE:

Dept. of Microwave Engineering,	Dept. of Electronic Engineering,
Dept. of Information Engineering,	Dept. of Integrated Circuit and Systems
Electronic Experiment Center	

- IEEE MTT Chengdu Chapter
- IEEE Joint AP/EMC Chapter
- IEEE EDS Student Chengdu Branch
